

State of the art multi media technology guarantees a perfect flow at the highest level for all different kinds of events covering:

Seminars & congresses, product presentations, theatre, concerts, lectures & movies... and many more

All of the required equipment needed for such an event is pre-installed and available on site (see equipment-list)

Facts:

- The media and stage technology is fully automated and can easily be controlled via a wall touch-panel
- Large screen projection (4,00x3,00m) for presentations
- Notebooks or other video sources can simply be plugged into patch-panels. Those signals can be viewed on screen.
- Audio devices such as CD or lap-tops and microphones can be plugged into patch-panels serving as a signal source for the sound system
- DVD- and CD-player, SAT-receiver for TV are pre-installed
- A 360° remote control camera is available to record the people, the show or products with the signal being seen on screens and monitors.
- Perfect sound provided by the Meyer Sound audio system
- Mobile conferencing system with 21 speaker positions is available, too.

The installed components from well-known manufacturers stand for the highest quality.
